COVER PICTURE

The cover depicts the annual timber harvest by county for the State of Montana. The graphic was done by Dr. James Ullrich of the University of Montana computer center. The county level timber harvest data is from information obtained through the Montana Forest Industry Data Collection System developed by the Bureau of Business and Economic Research at the University of Montana.

INTRODUCTION

The lumber industry is vital to Montana. Of the manufacturing workers in the State, almost 40 percent are employed in the forest products industry. This directory has been compiled for the use of people who need the services of this important industry. It lists individuals and companies which offer wood products to the public. It also lists those engaged in logging.

A great number of companies and workers are associated with the lumbering industry, and changes occur constantly. Some of these changes may have happened after this directory was completed. It may not, therefore, list all businesses in operation.

The Forestry Division of the Department of Natural Resources and Conservation would appreciate hearing from any individual or company that this directory omits or lists incorrectly. Please address all correspondence to:
